

RECONDITIONED ENGINE SPARES

QuantiServ provides reconditioned piston crowns and exhaust valve spindles for low speed two-stroke engines of all brands. A special sales action aims to promote this attractive offering with very competitive prices.

FIRST CLASS SERVICE

QuantiServ provides reconditioned pistons and exhaust valves for low-speed two-stroke engines of all brands. A special sale will be initiated to promote this attractive offering, with very competitive prices!

QuantiServ offers an unbeatable combination of excellent quality, first class service and most attractive costs for reconditioned parts.

- **As new quality** thanks to industrialized technologies
- **Global availability** of exchange parts in various hotspots
- **Flexible logistics** with globally coordinated local distribution and collection
- **Attractive pricing** enabled by cost-efficient reconditioning procedures

AS NEW QUALITY

Thanks to robotized welding and automated manufacturing technology, our reconditioned products are simply as new. And this goes for dimensions, specifications, performance and component lifetime.

Consequently, the only difference between reconditioned and new parts is the cost!

GLOBAL AVAILABILITY

QuantiServ operates workshops all over the world. The reconditioning centres do not only offer quick reconditioning services on the customers own parts.

They also keep stock of the most commonly used exchange parts, allowing an immediate replacement of worn out parts. The used component is returned later. This allows us to provide reconditioned parts without waiting time!

FIRST CLASS SERVICE

Reconditioning solutions come with all QuantiServ standards:

- **Available as two options:**
 - As reconditioning service on the customer's own parts
 - As exchange parts, ready in stock
- **Global logistics services** for more than six worldwide stock locations
- **Highest quality standard** on request, complete with class certificates

Logistic services

Based on our dense service network, we overcome logistic challenges efficiently and offer short lead times.

Applicable range

All low-speed two-stroke diesel engines of any brand.

Special sales days

QuantiServ uses technological procedures and methods, which have been continuously developed, refined and tested over the last 40 years.

The application of these advanced techniques has allowed an unrivalled and cost-efficient reconditioning offering.

Customers get the advantage of these especially attractive prices in 2018. After this date, it is possible to secure the beneficial conditions with a supply agreement for reconditioned engine parts.

QuantiServ offers specialised, fast and reliable support, maintenance and repair services for customers operating equipment of multiple brands, both in the marine and energy sector.
